Fig. 3

The screenshot shows the SQL Server Enterprise Architect Mapping Designer interface. The top menu bar includes Repository, Edit, View, Tools, Layout, Mappings, Transformation, Window, and Help. The top toolbar contains icons for various database operations. The main workspace displays a data flow diagram with the following components:

- Source Table: ATTENDING_PYRAMIDS_W** (Source Definition Shortcut)

Name	Datatype
ATTENDING_P...	number
ATTENDING_P...	varchar
ATTENDING_P...	varchar
- Lookup Table: LKP_attending_pyramids_work** (Lookup Procedure)

Name	Datatype
ATTENDING_PY...	double
ATTENDING_PY...	string
ATTENDING_PY...	string
ATTENDING_PY...	double
- Lookup Table: LKP_attending_pyramid_name** (Lookup Procedure)

Name	Datatype
SCHOOL PYRA...	double
SCHOOL PYRA...	string
SCHOOL PYRA...	string
ATTENDING_PY...	string
- Filter Table: FIL_attending_pyramid** (Filter)

Name	Datatype
ATTENDING_PY...	double
ATTENDING_PY...	string
- Target Table: ATTENDING_PYRAMIDS_W** (Target Definition Shortcut)

Name	Datatype
ATTENDING_P...	number
ATTENDING_P...	varchar
ATTENDING_P...	varchar

Arrows indicate the data flow: from the source table to the filter table, then to the target table. There are also connections from the lookup tables to the filter table and the target table.
